Super 8 Color Reversal Material / Development
E-6 Processing

Wittnerchrome 200 D (200 ASA Daylight / Agfa Aviphot - Polyester Base)
and other E6 materials (e.g. Ektachrome 100D)

Material	Quantity	Prices in EUR	Art.No.
Wittnerchrome 200 D (Agfa Aviphot - polyester base)		without VAT / incl. VAT	
Super 8 cartridge (15m)	each cartridge	38.70 / 46.01	982
Film material incl. voucher* (* development & Germany-wide shipment)	" "	57.10 / 67.95	9821
Film material incl. voucher* (* development & worldwide shipment)	" "	58.80 / 69.98	9822
Wittnerchrome 200 D (Agfa Aviphot - polyester base)			
Standard 8 film (2 x 7,5m)	each film	38.70 / 46.01	986

It is important to use the correct filter setting for daylight film with a Super 8 camera

For daylight shooting - Camera set to tungsten / bulb icon (without filter)
For tungsten shooting - Camera set to tungsten with external color correction filter

Please note:

Wittnerchrome 200D

Polyester based material.

Splicing can only be done using splicing tape or ultrasonic splicer.

The material will be developed / processed to a sensitivity of 160/200 ASA by ANDEC.

Sensitivity of E6-standard development / processing could be slightly higher.
