

Dear customers from across the UK,

Due to the apparent hard Brexit we'd ask you to use the services of companies like On8Mil , Gauge Film or the Widescreen Centre when sending films for development.

Those shops in the UK will send films in bulk and we'll return them in kind, so we don't have to deal with customs for every customer from the UK sperately.

Those companies usually send films once per week so it shouldn't affect the turnaround time much.

Sending in your film(s) individually may result in higher costs since there are certain stipulations we have to fullfil for German tax laws to be able to send films into non-EU countries.

If you still want to send your film(s) without the assistance of the above companies be sure to check our customs notes:
